SYSTEM PILLARS

Everything needed for trustworthy field accountability.

Secure identity flow

Session-based access, protected routes, and hashed credentials keep every shift entry controlled.

Attendance with proof

Start each patrol with a selfie capture, a location stamp, and a durable attendance trail.

**Live activity pulse**

Track patrol notes, alerts, and check-in events in a clean command feed for managers.

**Mobile location tracking**

Field devices can sync geolocation updates to show where guards are operating and when they last moved.

**Local selfie storage**

Selfie proof can be stored locally for development or permanently in uploads for live deployments.
